Incentive Bonus – for every OHM client sending a participant from your company to the OHM USER GROUP MEETING (UGM).

For all our standard software upgrades of all products and versions we will be providing the next frozen release of the product at the OHM UGM. You always receive the standard updates (software) at no charge under WES program. The bonus incentive will provide you, the software updates, installation on a testing machine (see attached overview) and training on each of the new feature and functions and when you are done testing we will move the updates from the test machine to your standard server, **all at no charge** to you (if under WES) and you send a participant from your company to the OHM UGM. Wait there is more... Attached as part of this business update is our new proposal of testing of updates to your system and the additional benefits to having a test server. It is a stand alone machine that can also act as the middleware for CRM if you obtain OHM's R.E.A.L. product for the internet and it is a mini backup system for your immediate daily or interim use. As part of the bonus incentive you will be trained on how to setup new releases, test and move to live on your own. Of course OHM is always available to assist as and when needed, but we are developing and improving the methods for self installation of updates to automate the process for all clients. Under separate cover you will receive the list of all enhancements and updates to the middleware and to the application software from the last frozen version. Starting with this release date of May 1st, you will receive three times a year a list of patches and enhancements and a frozen release. May 1, Sept 1 and January 5 of each year.
