# SPECIAL EDITON

## E I S Executive Information Systems

Thursday February 26th at 1:30pm EST or Friday February 27th at 10:30am EST

Calling all Executives and CFO's for review of OHM's **EIS Module**

This is a special invitation for your input. As OHM finalizes 1.0 release of the EIS module we are seeking input from executives and CFO's to the types of dashboard retrieval they would want in this system. When you log in to check status in the morning, what type of "flash" report or status do you want to see in a summary quickly? How displayed? Line chart, graphs, dials?

What type of information? In what format? How displayed? How detailed?

OHM will show you the current standard layouts of our design and direction of the module. Your input and feed back is requested.

Come join us for 30-45 minutes on a webinar. Email your interest to attend which session and we will include you on the webinar invitation.

For consideration of those who sign up and participate we will provide you with a \$500 /off the EIS module list price, should you decide to license the module when released.

**GO DITIAL - GO GREEN**
